

## **Cascade Campus Goals 2010-2011**

1. Effectively manage the dramatic increase in Campus enrollment while maintaining a high level of student service.
2. Continue initiatives to increase student retention, as measured by indicators such as successful course completion, persistence from term to term, maintaining good academic standing, completing degrees and certificates, and transferring to four-year institutions.
3. Promote a culture of student success through information exchange between and among faculty and staff, peer-to-peer collaboration, and by encouraging the use of student support services.
4. Promote safety on Campus and in its vicinity through services, training, and community involvement.
5. Explore new curriculum possibilities, enhance existing offerings where feasible, and investigate ways to instill sustainability curricula across the academic disciplines.
6. Raise awareness of sustainability as a core institutional value, and work to improve overall Campus sustainability.
7. Increase the inflow of external resources – such as grants, gifts, sponsorships and the like – to the Campus.
8. Complete the Cascade Campus Bond Master Plan by determining the location, scope and schedule of projects for the ongoing bond construction program.
9. Support PCC's Diversity Mission Statement by working to hire and retain a diverse workforce, creating an inclusive Campus environment, developing and enhancing the curricula to support learning and respect for diversity, and providing structures to ensure success for a diverse student body. Explore relationships with local graduate programs as a means of attracting more faculty of color.
10. Carry out other activities and outreach to grow and improve the Campus.
