

## How to Enroll in EET and its Options

**Step 1: Apply to PCC** on the Admissions website, [www.pcc.edu/admissions/](http://www.pcc.edu/admissions/)

**Step 2: College Placement Testing** is required for new students, [www.pcc.edu/resources/testing/](http://www.pcc.edu/resources/testing/).

Please check with the PCC Advising office if you have previous college credits and think you can have the placement test waived.

**Step 3: Meet with an EET Advisor.** To schedule an appointment, please contact Maniza Johnson, PhD, by phone, 503.977.4157 or by email, [mjohnson@pcc.edu](mailto:mjohnson@pcc.edu).

**Step 4: Complete an EET application.** The application forms are in the Engineering Office in ST 208 and on-line, <http://www.pcc.edu/programs/electronic-engineering/> PCC will issue a Student ID number (it's also referred to as a "G" number as it begins with G0). Once you have met with an EET advisor, completed an application, and provided your Student ID number, you will receive electronic permission to register.

**Step 5: Register online for classes.** Directions for registration may be found here: <http://www.pcc.edu/registration/online/>

### EET Faculty & Staff
