In addition to the departmental requirements listed above, students must also complete coursework for university admission, general education requirements, and BA/BS requirements. Meet with a PCC Academic Advisor to develop an effective transfer plan that will meet your individual needs.

PCC DEGREE/TRANSFER INFORMATION:

Associate of Arts/Oregon Transfer (AAOT) Degree – The courses listed above may be included in the AAOT degree. Students who complete this degree and are accepted at Washington State University-Vancouver are guaranteed to have their General Education Requirements (GER's) completed but, it does not guarantee junior standing or 60 semester credits.

Associate of Science (AS) Degree – The courses listed above may be included in the AS degree. The degree does NOT guarantee that students will be accepted as having completed all lower division comprehensive and General Education requirements for a baccalaureate degree. Student should work with an Academic Advisor to plan for transfer to the school and major of their choice.

PCC endeavors to create accurate transfer guides for students; however, requirements may change without notice. Students are responsible for working with PCC advisors and their transfer institution to ensure that their academic plan will meet requirements and timelines.

Erin Madarang at madarang@vancouver.wsu.edu 360-546-9551

Graduates from WSU Vancouver's Business Administration program develop these skills through a unique, integrated curriculum that teaches:

Knowledge of Business Issues and Practices

Students are introduced to the business environment, the role of business in the economy, questions facing business, and theories for dealing with business problems.

Applied Skills

Students are provided the opportunity to learn and practice basic business methods and skills.

Conceptual Sophistication

Students develop the analytic and evaluative skills needed to identify, assess, and resolve "real world" business problems.

Our program enables students to progress from developing basic business skills to mastering and applying sophisticated conceptual frameworks. The program culminates with group projects, often in cooperation with local businesses.

ACCOUNTING Major

This Major is designed to provide comprehensive exposure to accounting issues for students interested in professional accounting careers including Certified Public Accounting or Certified Managerial Accounting.

BUSINESS ADMINISTRATION Major

The Business Administration Major builds on introductory courses to teach students how to apply critical concepts in Accounting, Finance, Management, and Marketing to solve business problems. Students earning the BA major are also encouraged to earn a Minor or certificate in their field of interest.

FINANCE Major

Students interested in working for financial institutions (including banks, insurance companies, savings and loans and credit unions) or in the investments field should consider the Finance Major. Finance deals with the raising, use, and investment of money or capital by individuals or businesses around the globe.

MANAGEMENT INFORMATION SYSTEMS Major

Management Information Systems (MIS) focuses on the application of technology including identifying information needs and change management associated with implementation of technology. This emphasis is quite different from Computer Science, which examines the efficiencies of the technology itself.

MANAGEMENT & OPERATIONS Major

The Management & Operations Major focuses on understanding how managers can improve organizational effectiveness by attending to the human side of the enterprise. Management & Operations deals with planning, structuring, and leading organizations; managing and being managed; relationship building across work groups and teams, and resolving conflict.

MARKETING Major

The study of Marketing involves the changing needs of commerce and promotion, and the creation of products and services designed to meet those needs. Marketing includes sales, advertising, promotion, retail management, marketing research, pricing, physical distribution, new product introduction, branding, international business, and e-commerce. The Marketing program at WSU Vancouver prepares students for a career in professional sales. Professional sales is the most common entry level position for marketing majors. Here at WSU Vancouver we provide an integrated program of study uniquely designed with courses in professional sales, sales management, negotiations, and business to business marketing.
