Learning Outcomes and Learning Activities

1. Find the list of CCOGs for a class you would like to develop as a hybrid. See http://www.pcc.edu/ccog/
2. Consider question 2 of "Questions for Reflection". Identify 2 competencies/skills that lend themselves to online delivery. (Why? How did you choose?)
3. Focus on one or more of the competencies and list some techniques you would use in these areas.

Engaging Interactive Activities

Integration Techniques

Considering the whole class in general:

1. How would you structure the proportion of F2F / online time and the actual class time schedule?

2. What specific class management practices would you use?
