ADDENDUM #5
Invitation to Bid (ITB)
Waste Hauling, Refuse & Recycling

**Question:**

Can you confirm how you would like the calculations on the pricing sheet made?

- Will each proposer multiply the total by 12 for the aggregate total or will the multiplication by 12 be done during the bid review by PCC?

**Answer:**

1. The vendor to submit the monthly cost, per the following example:
   
   a. Monthly Rental per six (6) Cubic Yard Refuse Container
      
      $10.00 \times 1 = $10.00 (a. line item is only the monthly cost)

2. The **aggregate total** for all items will be determined by all monthly rental costs for all line items, multiplied by twelve (12) (amount of months in a year).

Example:

   b. Monthly Rental per six (6) Cubic Yard Refuse Container
      
      $10.00 \times 1 = $10.00 (a. line item is only the monthly cost, the **final aggregate total** to include $10.00 \times 12 \text{ (months)} - $120.00)

The vendor to submit the cumulative cost of all line items (monthly rental costs) times twelve (12) (yearly cost), for their final aggregate total.
