The Future: Digital Content Creation

Content Creation

Welcome to the Computer PIC, an ongoing project designed as a resource for students learning various aspects of PIC.

This course offers guidance on things a student needs to do well in a composition class, such as being prepared and taking notes, how to make a good outline, and how to write a good thesis statement. While the Computer PIC is not a substitute for good class composition software, it does have features that allow websites, but does also contain an in-depth introduction to digital content creation. This includes guidance on how to make a good outline, and how to write a good thesis statement.

The Future: Digital Content Creation

Communication & Collaboration
