Resources on the Rock Creek Campus

The Computer Information Systems Department on the Rock Creek campus invites you to take advantage of the resources provided for CIS students.

Advising

All students are encouraged to meet with a CIS faculty advisor from time to time in order to make an academic plan. New courses are added and coursework revised; it is important that students keep in touch with an advisor in order to stay up-to-date and on track towards their goals. Contact Tina Heber by email or call 503.614.7447 to make an appointment.

Students may also contact CIS faculty member, Bill Bruno by email or phone 503.614.7421 for advising assistance.

Computer Labs on the Rock Creek Campus

The Computer Resource Center located on the second floor of Building 2 in Room 257 and is available for students to use. Visit their website for information regarding hours of operation, tutoring services, and a list of center resources.
