

Chemical Hygiene Plan – Appendix D: Inventory of Carcinogens and Other Specific Hazards

In its Laboratory Standard, OR-OSHA requires the establishment of additional protections for persons working with “Particularly Hazardous Substances”. OSHA defines these products as “select” carcinogens, reproductive toxins, and acutely toxic materials.

As part of the additional protections required, each location must have an inventory of carcinogens which PCC has expanded to include chemicals that have been classified by the GHS / SDS system as having the following hazards: (See Appendix C for further explanation of the following categories)

Carcinogen as a:

- Category 1 (includes 1A and 1B): Known or presumed human carcinogen
- Category 2: Suspected human carcinogens

Reproductive Hazard as a:

- Category 1: Known or presumed human reproductive toxicants
- Category 2: suspected human reproductive toxicant and effects on or via lactation.

Germ cell mutagenicity as a:

- Category 1A: Substances known to induce heritable mutations in germ cells of humans
- Category 1B: Substances which should be regarded as if they induce heritable mutations in the germ cells of humans

Acute toxicity

- Category 1
- Category 2

As some products used at PCC are classified as having more than one of these hazards, this inventory has been organized as a table to better present this information.

The number and letter combination in each column corresponds to the classification category for that hazard.

Cascade - Chemistry, Biology, and MLT - JH Room 222

Product Name	CAS #	Carcinogen	Reproductive Toxin	Germ Cell Mutagen	Acutely Toxic
Chloroform, stabilized with ethanol	67-66-3	2			
cholesterol liquid			2		
Cobalt carbonate	513-79-1	2			
Congo Red	573-58-0	1B			
Crystal Violet	548-62-9	1B			
Diacetyl	431-03-8			1B	
Formaldehyde solution 37%	50-00-0	2			
Glucose oxidase liquid			2		
Lerner Mucolexx		1A			
Minwax Indoor/Outdoor Helmsman Spar Urethane (aerosol) clear gloss	mixture	2			
Para-Pak 10% Formalin	50-00-0	2			
Permout Mounting Media			2		
Phenol Red Solution 0.025%		1A			
Phenolphthalein, powder	77-09-8	2			
Potassium Cyanide	151-50-8				1
Potassium Nitrate	7758-09-0	2			
Sodium azide	26628-22-8				1
Sulfuric Acid, GR	7664-93-9	2			
Toluene reference substance for gas chromatography	108-88-3		2		
Tris Borate EDTA buffer, 20x			1B		
Xylenes		2			
Zinc Metal Powder		2			

Rock Creek - Biology - Building 7 Room 122

Product Name	CAS #	Carcinogen	Reproductive Toxin	Germ Cell Mutagen	Acutely Toxic
1-Naphthylamine	134-32-7	1A
