Confined Space Entry & Utility Tunnels - Form 3: Permit-Required **Confined Space Rescue Plan**

0 -					
Se	ction 1: General Considerations				
Before an employee can enter a permit-required confined space (PRCS), department managers					
	must develop and implement procedures to remove entrants in the event of an emergency or when				
	they are unable to evacuate without outside assistance.				
Ho	w will rescue services be summoned?				
Цо	wwill amarganay madical carriage be summaned?				
ПО	w will emergency medical services be summoned?				
Hov	w will an injured employee be transported to a medical facility?				
	What is the process for ensuring that a safety data sheet (SDS) or other written material is provided				
for	any hazardous substance to which an employee may be exposed?				
Section 2: Rescue Types Complete either A or B					
	Non-Entry Rescue				
	te: this is the only type of rescue trained PCC employees are allowed to p	erform at	the en	try of a	
''	permit-required confined space.	omomm at		ay or a
