**Prepare the battery pack**

1. Insert the battery pack.
   - Push the back part of the battery pack gently and slide it clockwise to attach it.

2. Lift the inlet plug and connect to the wall outlet (wall socket).
   - Battery charger

**CHARGE lamp**
- Light on: Charged
- Light off: Connected (Practical charge)

If you are continuously using the camera for about one hour after it is fully charged, the charge will last slightly longer.

- Connect the battery charger to an easily accessible wall outlet (wall socket) close by.
- Even if the CHARGE lamp is lit, the battery charger may be damaged by short-circuiting the AC power source if the plug is connected directly to an extension cord, power strip, etc.
- When charging is finished, disconnect the battery charger from the wall outlet (wall socket), and remove the battery pack from the battery charger.

**Digital still camera - DSC-W100**
- The time required to fully charge the battery pack (supplied) from when it is completely discharged at a temperature of 20 °C (68 °F) is approximately 270 min., and the practical charging time is approximately 230 min. Charging may take longer under certain circumstances or conditions.

**When there is no “Memory Stick Duo” inserted**
The camera records/playback images using the internal memory (64 MB).

**Insert a “Memory Stick Duo” (not supplied)**

- Insert the “Memory Stick Duo” all the way into the clock.

**Select the image size for use**

1. Select a mode.
2. Press 4, or (Image Size).
3. Select the size with , then press .
4. Press 4, or (Image Size) to complete the setting.

**On still image sizes**
- For details on image size — “User’s Guide/Troubleshooting” (page 16)
- The default settings are as above.

**Using the AC Adapter**
You can connect the camera to a wall outlet (wall socket) using the AC-LS5K AC Adaptor (not supplied) — → “User’s Guide/Troubleshooting” (page 25)

**To change the remaining battery time**
Press POWER button to turn on and check the remaining battery on the LCD screen.

**To check the remaining battery time**
Press POWER button to turn on and check the remaining battery on the LCD screen.

**Battery remaining indicator**
- Battery full; the (Fully charged) icon is displayed.
- Battery is low; the (Battery remaining indicator) icon is displayed.
- Battery empty; the (Battery remaining indicator) icon is displayed.

**Other memory cards cannot be used.**
- For details on “Memory Stick Duo” — “User’s Guide/Troubleshooting” (page 9).

**Other memory cards cannot be used.**
- For details on “Memory Stick Duo” — “User’s Guide/Troubleshooting” (page 9).

**Notes**
- Charge the battery pack supplied before using the camera for the first time.
- The LCD screen is manufactured using extremely high precision technology to ensure 99.99% of the pixels are operational for effective use. However, there may be some tiny black points and/or bright points (red/blue/green) on the LCD screen, which appear to be constantly. In some cases, they are normal in the manufacturing process and do not affect the recording in any way.
- The camera’s precision mechanism is so delicate that it is necessary to keep the lens of the LCD screen clean, and to avoid applying force to it. Avoid exposing the camera to damage from dropped, bangs, etc.

**Precautions for use**
- To prevent the camera from damage, do not use it in extremely cold or hot places.
- To prevent the camera from abnormality in the battery terminals, clean the terminals with a soft cloth or a dry toothbrush.
- Do not use an electronic transformer (travel converter), as this may cause a malfunction.

**Check the remaining battery time**
Press POWER button to turn on and check the remaining battery on the LCD screen.

**Remaining battery guidelines**
- Battery remaining indicator
- Battery full; the (Fully charged) icon is displayed.
- Battery is low; the (Battery remaining indicator) icon is displayed.
- Battery empty; the (Battery remaining indicator) icon is displayed.
