GRN 166 – Redesigned for Remote Delivery
CRN26264
Therapeutic Horticulture in Health & Human Services

Spring 2020

Therapeutic Horticulture in Health & Human Services

In this class you will learn how a therapeutic horticulture garden program can improve a person’s well-being through effective and sensory based encounters with plants that stimulate and engage their five senses. Seasonal planning and hands on activities will be demonstrated.

See more about GRN 166 and other therapeutic horticulture courses at pcc.edu/horticulture.

Spring Term 2020 Now Offered Online & Remotely

Online course available May 11th through June 13th
