REVISED Schedule of Therapeutic Horticulture Core Course Sequence
Summer 2021 to Spring 2022 Terms

This sequence of 6 courses (14 credits), configured for completion within four terms, meets the AHTA professional training requirements for HTR registration. All courses are offered online with required Zoom meetings. Online content is enhanced by Zoom conferencing and breakout group work, videos of gardens and HT processes, guest lecturers, and more. The required Zoom meetings are all live on the listed Saturdays (8am-12pm Pacific), and every week on Thursdays, 5-6pm Pacific). These Zoom meetings will be recorded, but live attendance is required except for excused absences.

Since this is a sequence, if you miss a course, you will need to wait for the following series to take the remaining courses. In some cases, based on prior education and experience, the instructor *may* allow a student to begin the sequence late, but only in exceptional cases.

Summer Term 2021
