LAB §2.7

DAMIEN ADAMS

1. Use the graph of f provided below to calculate the following values.

- | | | | |
|------------------------------------|------------------------------------|-----------------------------------|-----------------------------------|
| (a) $f(-3)$ | (f) $\lim_{x \rightarrow -2} f(x)$ | (j) $f(0)$ | (o) $\lim_{x \rightarrow 2} f(x)$ |
| (b) $f'(-3)$ | (g) $f(-1)$ | (k) $f'(0)$ | (p) $f(3)$ |
| (c) $\lim_{x \rightarrow -3} f(x)$ | (h) $f'(-1)$ | (l) $\lim_{x \rightarrow 0} f(x)$ | (q) $f'(3)$ (<i>Estimate</i>) |
| (d) $f(-2)$ | (i) $\lim_{x \rightarrow -1} f(x)$ | (m) $f(2)$ | (r) $\lim_{x \rightarrow 3} f(x)$ |
| (e) $f'(-2)$ | | (n) $f'(2)$ | |

2. Given the graph of $y = f(x)$ provided below, sketch a graph of $y = f'(x)$.

3. Sketch the graph of $f(x) = \cos x$. Below your graph, sketch the graph of $f'(x)$ by first identifying when $f'(x) = 0$ and then identifying when f' will be positive and when it will be negative.
4. Let $f(x) = x^2 - x + 1$.
 - a. Use the definition of derivative to calculate $f'(x)$.
 - b. What is the domain of f ?
 - c. What is the domain of f' ?
5. Let $g(t) = \sqrt{t}$.
 - a. Use the definition of derivative to calculate $g'(x)$.
 - b. What is the domain of g ?
 - c. What is the domain of g' ?
