

Julia Dittmer, instructor, *Beginning Sculpture*

I am a multi-media artist who loves to build things. I use wood, paper, fabric, metal, bamboo – anything I find that suits my ideas. I believe in being as fearless as possible, “... *just go for it, and figure out how to do things as you go...*” In 2007 I built a full-sized space capsule-like vessel that I could sit in and think about traveling to other worlds, followed by a glider made of bamboo. I am enthusiastic about creative exploration, and love to assist others in their creative pursuits.
