

PACIFIC NW SALMON:

UNDERSTANDING THE CRISIS

Dive into the critical challenges facing Pacific Northwest Salmon populations. Explore the devastating impact of human activities, climate change, and habitat disruption of these vital species. Discover the ongoing efforts to protect and restore salmon habitats and learn what you can do to help safeguard the future of these iconic fish. An optional field trip outside of class time will be offered to Bonneville Dam to help reinforce concepts learned in class.

Item#19148, **Summer term 2026**, Fee: \$49, Prime-Time Learning series

Date: Monday afternoons (2-sessions); **July 13th, 20th**; 1:30 pm to 3:30 pm

Where: CTC Campus (18700 SE Mill Plain Blvd), *in-person*, Room #338

Instructor: Prof. Kyle Dittmer, office (day): 503-731-1314, kdittmer@clark.edu

TOPICS:

- Week#1: What is the context of Salmon, i.e., "Why is Salmon important to the peoples of the Pacific Northwest"?
- Week#1: What are the natural/environmental factors that affect the Salmon and its life-cycle?
- Week#2: What are the four major causes for the decline of PNW Salmon in the last 150 years?
- Week#2: What actions can be done to rebuild the Salmon populations in the PNW?

FORMAT:

Lecture format, PowerPoint slideshows, and You-Tube videos. Students are encouraged to share their views and experiences on the PNW Salmon crisis.

Community and Continuing Education classes are Clark College's non-credit course options - they are often connected to academic pathways at Clark College. More about the CCE program: <https://www.clark.edu/cce/about-cce/>
