Portland Clinic  
Street  
City

Clinic Manager:

Having a natural affinity for understanding science and a desire to play a role in health care I am a natural fit for your opening for an entry level Medical Laboratory Technician. I am a recent graduate of the MLT program at PCC and I have laboratory experience not only from my practicum hours but also from my work study. I am eager to discuss any entry level openings you have.

In addition to my practicum experiences I have been a Chemistry/Biology Lab Assistant at PCC where I kept the lab organized and prepared solutions for class activities; provided clerical assistance in a hospital lab setting and volunteered in the Components Lab as an Assistant for the Red Cross. I have always found opportunities in addition to my practicum experience to gain more lab skills and techniques. I have consistently worked or volunteered about 10 hours a week in addition to my studies. My Practicum supervisors have found me to be a good student and willing to learn. As you can see I am very motivated and prepared for an entry level position in this field. In my previous career as an Accountant I developed the ability to maintain focus for long periods of time while conducting repetitive tasks that required analysis I have found this ability to be highly useful in lab work.

You will find me to be an employee who brings not only recent training but a history of professional employment and the ability to self-manage while understanding team responsibility.

I look forward to discussing my interest in Portland Clinic's Lab Tech I position. I may be reached at your convenience at the number listed above.

Sincerely,

Hahn Minh
