Core Lab Manager
Portland Providence Medical Center
11111 N Glisan Ave.
Portland, OR 90000

Dear Core Lab Manager:

My experience in a high volume laboratory is only one reason why I would be a great addition to the rapid response team as a Medical Laboratory Technician. The past three years working at Portland Providence Medical Center as an inpatient phlebotomist/processor has taught me more about the medical environment than I ever anticipated. I believe in our core values of compassion, justice, respect, excellence, and stewardship, and plan on implementing them as I advance in my laboratory career.

This coming August I will be completing my degree in Medical Laboratory Technology at Portland Community College and sitting for the NCA and ASCP exams. The technical skills I have learned through my academics and clinical rotations at local hospitals have given me the qualifications for an entry-level position.

My work experience as a phlebotomist has allowed me to view a laboratory specimen for more than what meets the eye. Being able to put a face with the name on the label gives a compassionate reminder of the importance of each test performed. This experience has motivated me to help people in a way that matches my desire for hands-on technical work. Being familiar with the Providence Laboratory System will also expedite my necessary new employee training.

I look forward to discussing further interests and qualifications for this position with you. I can be reached in any of the following contact ways 503-978-5600 or billnye@scienceguy.com. Please do not hesitate to call me with any questions. I have references available to contact as well. Thank you so much for your time.

Sincerely,

Bill Nye
