## Rock Creek Power Shift:

### We have the power to save energy

#### **I pledge to reduce my electrical energy consumption in my office and on campus.**

Please pick at least one behavior to change or write in your own specific action.

- I will connect multiple equipment (computers, printers, etc.) to a power strip I can turn off at the end of each day.
- I commit to unplug appliances and electronics when not using them at the end of the day because many draw electricity even when they are turned off.
- I will power down my computer and monitor when I won't be using it for more than 2 hours. I'll save up to (1.1) lbs of CO2 per day.
- I will always turn off the lights when I don't need them. It seems pretty basic, but I pledge to remember to do this in my office, conference rooms, bathrooms, classrooms, etc. too.
