For MacOS Leopard (10.5): Make sure you are connected to PCC’s wireless network, for assistance with this, see a Lab Assistant.

1. Open the System Preferences and choose Print & Fax

2. Below your list of current Printers, click the (+) Symbol to add a printer.

3. Click "Advanced" in your list of choices at the top of the screen. 
   (If Advanced is not an option, control-click in the gray area next to your list of choices to add the Advanced option)

4. The Advanced tab will take a minute to load. When it does, select "Windows" for Type.
For the URL Field: Enter: smb://guest:@server.pcc.edu/printer-name

See the downloadable list of wireless printers on the web page (Here) where you found this guide to find the server and printername for the correct campus and printer.

5. The Name field should automatically change to server.pcc.edu. Leave the Device Field at its default setting (“Another Device”)

6. In Location Field, give the printer a Location. For example, “Sylvania Library” This name can be whatever you want.

7. In the Print Using pull down menu, choose HP LaserJet 9050 for the black & white printing, or HP Color LaserJet 4700 for color printing. Please confirm the actual printer model being used at your location.

8. Click “Add”
   A new window should option with Installable Options. Leave these at their default settings and click continue.

9. The Previous Window should close, and you will be returned to the Print & Fax Screen with your list of Printers, which should now include a printer called pccprint.pcc.edu.
10. Open a new Safari window.

11. In the address box type https://pccprint.pcc.edu:7773 and hit enter.

12. You will get a security warning about the website certificate. Click the link “continue to this website”.

13. Log into your Go Print account, using the same login information you would in the computer lab.

14. Check the print job you want to print and click the pay and print button at the bottom.
