Percent of Credit Student FTE Taught by Full-Time Faculty

Trends showing fall credit FTE and the percentage of credit FTE taught by full-time faculty are displayed in the following graphs. All credit sections are included with the exception of dual-credit classes and sections missing instructor and/or pay type information.
Notes:

Sections taught as “overload” were included with full-time faculty.
The following data inconsistencies were discovered in compiling the full-time faculty ratios:
- Multiple instructors assigned to a shared crn
- Other (non-faculty) employee type assigned to a crn
- Individuals with “no pay” status in non-cross listed crns
While these factors do not significantly affect college or campus-level ratios, further disaggregation at the subject level may be misleading.
