## CTE POS Course Lists—Secondary

Please list the CTE Program of Study **Secondary Courses** below. “Core Courses” are those in which the CTE teacher will:

- Teach with intent and purpose the CTE POS knowledge and skills identified in the CTE POS' Skill Set
- Assess and record student achievement of those standards
- If your secondary school does not have course numbers, contact **Ilene Spencer**
- It is expected that it will take at least 2 credits to complete a skill set and prepare the student for the technical skill assessment.

<td>✗</td>
<td></td>
<td>Covers basic principles of steering, suspension and wheel alignment for passenger cars and light duty trucks. Familiarization with tire construction, types and sizing. Practice disassembly and re-assembly of steering and suspension system components. Familiarization and practice in using computerized 4-wheel-alignment equipment and tire balancing machines.</td>
</tr>
</tbody>
</table>

*CN = College Now—course identification as College Now (or articulated courses)*
Element 1: Standards & Content

X A. Relevant, rigorous standards-based content aligned with challenging academic standards;
X B. Shared secondary and post-secondary technical content which incorporates the knowledge and skills identified in the Oregon Skill Sets or other industry-based standards, which are validated through national and state employer input;
X C. The program is of sufficient size, scope and sequence to include curriculum and instruction leading to student attainment of academic and technical knowledge and skills for high school graduation, college entry, and careers within high wage, high demand fields.
X D. Systemic approach to CTE using industry-based academic and technical knowledge and skills where student performance is demonstrated through valid and reliable assessments aligned to industry standards; and
X E. Assure secondary and post-secondary students are prepared for high demand and high wage careers and occupations that are responsive to regional, state or global employment trends.
X F. Safety and drug-free workplace expectations are an integral, explicit and mandatory part of the CTE instructional program. Laboratory spaces with power equipment model a safe and clean learning environment. Available safety certification is required for students, as appropriate.
X G. Based on the Program Design and instructional plan where each student will:
   X Recognize connections between academic and technical content;
   X Meet diploma requirements, post-secondary entry requirements, and certificate/degree requirements;
   X Demonstrate mastery of academic and technical content that is aligned with industry standards;
   X Apply learning through authentic experiences, and
   X Build confidence to compete in high wage, and/or high demand occupations.

Comments and additional information: Please address the questions for both the Secondary Partner and the Post-Secondary Partner found in the "Areas of Strength" and Priority Concerns" worksheet at the end of this section of the Readiness and Sustainability Tool:

SUCCESSES:
Automotive students have the opportunity to learn the use and operation of the latest equipment. Tigard HS curriculum is aligned with the PCC curriculum. THS also uses the Oregon Skill Set and a state approved technical skill assessment in the operation of their curriculum. THS and PCC have a Dual Credit articulation program. THS has a 6 course POS to help them to receive a high school diploma, and prepare them for a direct entry into the related PCC program. I have good communication with the PCC instructors and students from THS who enter this class are reported to be well prepared in both their academic subjects along with the technical skills they need.

CONCERNS:
Find time out side of the school day to meet with PCC connection staff. Development of new and more partnerships with local businesses. I have been in the industry for many years and have strong connections to business owners (I was one before becoming a CTE teacher). It is hard to find time in the day to maintain all the connections necessary while teaching full time and multiple preps that involved intensive set up for each different class.

The academic community at Portland Community College (PCC) has developed and approved PCC Core Outcomes that are common to graduates of all PCC programs and aligned with general education goals. Core outcomes cover six areas—communication,
CTE Program Of Study (Perkins Eligible)….2011 Application (continued)

community and environmental responsibility, critical thinking and problem solving, cultural awareness, professional competence and self-reflection.

CTE students at PCC are assessed on their ability to demonstrate certificate and AAS degree outcomes for their program area of concentration. The current methods of assessment may include one or more of the following: oral or written examinations, quizzes, written assignments, visual inspection techniques, safe work habits, task performance, and work relations.

PCC’s Curriculum Support Office is in the process of gathering all current CTE Program Outcomes and publishing them to a website under their respective certificates and AAS degrees (http://www.pcc.edu/resources/academic/degree-outcome/index.html).

In the PAVTEC Work Sessions that included both PCC and secondary school staff, academic (reading, writing and math) entrance expectations of PCC and specifically PCC CTE programs were discussed and cross walked with high school course curricula. The curricula of the high school’s CTE Programs of Study, combined with the school’s diploma requirements, are designed to prepare students to meet or exceed those expectations.

In the college’s Automotive Service Technology program students are prepared for all segments of the repair industry including dealerships, fleets and independent repair shops. Partnerships between PCC and automotive repair businesses allow students to learn in the classroom and on the job. The college has also developed an on-site automotive shop that supplants all aspects of the industry, including: repair cares and light trucks with limited supervision; understanding different levels of repair business functions, oversight responsibilities and liabilities; assessment of repair information using rapidly changing technology; communicating effectively with employers, customers and co-workers; developing strategies and processes to solve vehicle repair problems; and performing vehicle repair to the highest professional, ethical and environmental standards.

Addendum A: Skill Standards/Content/Course Crosswalk

Directions: Create an Addendum A folder for properly identified examples of the items listed below:

Required documentation for Element 1:

- Identify industry validated technical skill standards/skill sets; list all Knowledge and Skill Statements for the Cluster, and include Focus Area KS statements if appropriate (Performance Indicators are not necessary for this documentation)
- Standards-to-course crosswalk/mapping—Please use the Excel spreadsheet posted online at (http://www.ode.state.or.us/teachlearn/pte/posexampleskillmatrixfield.xls), or use one you’ve created locally to crosswalk the identified Skill Set against the listed courses. All courses identified in the secondary and postsecondary course lists on pages 2 and 3 should be included.
Element 2: Alignment & Articulation

Ц A. An expectation that the elements defined in the Perkins Act will ensure a greater depth and breadth of student learning through the alignment and integration of challenging academic and technical standards in curriculum, instruction and assessment.  
[Sec.122(c)(1) & Sec. 134(b)(3)]

Ц B. A unified, cohesive sequence of content among secondary and post-secondary partners; a non-duplicative sequence of courses or learning experiences; students receive credit for prior learning whenever possible.

Ц C. Alignment of content between secondary and post-secondary education may include course articulation or other ways to acquire Post-secondary education credits (e.g. Oregon’s Credit for Proficiency, Dual Credit, etc.).

Ц D. Articulation agreements are developed, implemented and supported at the institutional level to ensure long-term sustainability and cross-sector cooperation.

Ц E. Based on the program design and instructional plan, each student will:
   Ц Not need to take a remedial course;
   Ц Continually progress in knowledge and skills when ready;
   Ц Earn high school or college credit based on performance; and
   Ц Make the connection between educational preparation and entry into a career.

Comments and additional information: Please address the questions for both the Secondary Partner and the Post-Secondary Partner found in the "Areas of Strength" and Priority Concerns" worksheet at the end of this section of the Readiness and Sustainability Tool:

SUCCESSES:
THS continues to coordinate classes with PCC staff through articulation meetings. THS is articulating its Auto 1 class with PCC where students can earn dual credits. THS aligns its Automotive program with the Automotive program at PCC by referring to the course curriculum outcome guideline (CCOG) for the PCC classes. THS students often move on to attend the Automotive program at PCC.

CONCERNS:
THS would like to extend the dual credit offering to include Auto Body as one of its articulating classes with PCC. THS would like to start conversation with PCC about this happening due to the increased interest in these areas. Plus THS is very close to PCC-Rock Creek where this offering resides. I have close ties to these PCC instructors. I will be working with the Dual Credit Coordinator to see how we can possibly do this.

CTE students count on their secondary academics and exposure to possible careers to help shape their futures. In this unstable economic climate, it is more important than ever to match secondary Programs of Study with post-secondary certificates or degrees that lead to high-wage, high-skill, and high-demand jobs based on updated regional or state labor market information.

Dual credit classes provide an opportunity for high school CTE students to transition smoothly from high school to college, in a non-duplicative program of study. Articulated courses also help in shortening time-to-completion of a degree or certificate. Having dual credit available to high school programs is a motivator for students to not only stay in school, but it also motivates students to do well in
their classes as articulated courses are directly tied to a college transcript. Dual credit courses offer a broader, stronger high school curriculum and assists with increasing student readiness for college level work.

Dual credit facilitates productive interaction between high schools and the college for curriculum development while enhancing college-school-community relations. In addition, articulation agreements reduce the redundancy of courses between high school and college. Coordinated curriculum helps to assure students meet college standards.

The college’s dual credit staff continues to work with high school CTE teachers to make sure students are properly registered for dual credit, and that grades are recorded for dual credit offerings. Dual credit registration is now on-line at the college so this will help facilitate the process for student’s to register and participate.

Allowing high school students to receive college credit for CTE high school courses that meet college standards is an important part of students’ successful transition to either post-secondary education or higher starting salaries. By providing specific guidance to meet college-level requirements, credit articulation agreements also help support higher quality secondary CTE courses and more qualified CTE teachers. It is important to acknowledge that a lot of barriers still exist that apply to awarding college credit for high school courses. Even when curriculum is aligned, there are issues relating to course delivery and/or instructor qualifications that are “deal-breakers” for dual credit. For Portland Community College, adherence to the faculty-defined Instructor Qualifications is tremendously important for maintaining accreditation standards. On the other hand, when students take a high school course that is substantially the same as a college course, there is reasonable concern that student effort may be duplicative.

In addition to the Institutional Articulation Agreements described above, course-to-course credit articulation agreements are in place for many courses, and will continue to be developed. Updated agreements are prepared annually in the fall by the college’s dual credit staff and signed by appropriate secondary and post-secondary staff.

In the Automotive Service Technology (AST) program, all PCC instructors serve as a liaison to high school automotive instructors in our service area. They visit their assigned high schools to discuss curriculum, industry requirements, and provide equipment donations. They visit with students in the labs.

The PCC AST program participates in spring term preview day by presenting three hands-on sessions for high school students who select to visit the auto tech program. In groups of about 30 each, the students are given a chance to take part in three different experiences throughout the lab including a presentation about program details.
1. Element 3: Accountability & Assessment

A. Business, community and education partners, such as an Advisory Committee, participate in evaluating program vision, goals and priorities such as:
- Assist in CTE program of study development and validation of industry skill standards for curriculum content and technical skill assessment, where appropriate.
- Play an active role in curriculum development, implementation and program evaluation.
- Participate in the CTE teacher recruitment, instructor appraisal process and ongoing faculty professional development.

B. Each Perkins-eligible CTE program of study’s performance shall be measured against the set of Perkins-required performance measures as described in Perkins IV Measurement Definitions. [Perkins Section 113 (2)(A-B)].

C. Perkins performance data is used for data-driven, CTE program of study improvement decisions (See page 12 of this document).

D. Based on the Program Design and instructional plan, each student:
- Monitors their own progress through their demonstration of attaining standards.
- Demonstrates their technical and academic proficiency in meaningful ways.
- Adapts their program to meet their personal goals based on industry requirements and performance outcomes.

Comments and additional information: Please address the questions for both the Secondary Partner and the Post-Secondary Partner found in the "Areas of Strength" and Priority Concerns" worksheet at the end of this section of the Readiness and Sustainability Tool:

SUCCESSES:
THS works with formal network of partners (Landmark, Halsey Automotive, Halsey Import Parts, PCC, UTI, WYO Tech) I draw from these groups for formal presentations like our “Career Night” and I invite them into the classroom to present to my advanced classes. Auto courses at THS offer practical and experiential learning opportunities for a wide range of students and provide them with applicable skills for a wide variety of careers.

Each class uses many hands on techniques to acquire technical skills. Many of my formative assessments are using engines and setting tasks to problem-solve issues. This allows me to adjust my curriculum to student needs and incorporate feedback from business partners and PCC instructors. I also use a state approved TSA for my program. Jay is working with Mike Herdrich at St Helens HS to use the same Dennis Mattoon model. They will meet over the summer and work out any logistics that Mike may have found difficult to administer or any flaws in the administration of this locally produced test. Jay will get this test approved or declare which assessment he is using by September 2011 and will give the state approved TSA (or CTECS) May 2012 for district CTE data collection.

CONCERNS:
To expand the number of job shadows with our business partners. This takes time and effort during work hours that I often find filled working with students and attending other meetings.

Instituting “valid and reliable” Technical Skills Assessments across a broad range of Programs of Study is a challenge that continues to need evaluation, development and implementation. In order to meet the ambitious Technical Skills Assessment reporting deadlines, all Perkins-eligible CTE programs at Portland Community College have begun collecting and sharing information about what each CTE program is currently doing for skills assessment, discussing technical challenges that interfere with other comprehensive assessment,
Element 3 (continued: Student Data)

**PRIOR CTE STUDENT PERFORMANCE DATA ANALYSIS**

**Secondary Student Data Analysis—part 1**

An analysis of prior CTE concentrator performance will help identify any performance measures that may need to be addressed to increase concentrator academic and technical skill attainment, as well as the other performance indicators. The analysis of prior CTE concentrator performance data may guide you toward identifying appropriate priority goals and strategies for CTE program improvement.

In the fields below, enter the student data you have for prior year student data for up to 3 prior years. Also, enter this year’s Target Performance goals, as well as actual Current Year School Wide Performance Data.

Secondary Student Data Analysis—part 2
Element 3 (continued: Student Data)

Please address the following Guiding Questions for analysis of your CTE performance data listed on the previous page:

1. How does your CTE concentrator performance compare to statewide performance on the CTE performance indicators?

   Our performance compares favorably with statewide data. Differences are not statistically significant. Except in the area of 1S2 THS far exceeds state result 80.84% to 66.38%.

2. What might be the cause of your current performance if it lags behind statewide academic or CTE indicator performance?

   Our performance compares to state-wide data favorably.

3. How does your program’s CTE concentrator performance data compare with school-wide student performance data?

   Our CTE students exceed school-wide data in math, reading and writing.

4. Do you have indications that your CTE concentrators continue with their CTE program of study at the post-secondary level? Do any of these students require remediation before they continue with their program?

   PCC has no way of tracking our students to particular programs and to connect with student needs for remediation.

5. What questions does your student performance data raise?

   According to the above data above our students are performing very well. How can we track students better w/o the use of anecdotal data. School district budgets are cut to the bones, ODE can no longer support the data they gave us in the past. Teachers are being asked to do more and more with less and less. How do we form data groups that supply us with the information needed for good to great program improvements?

6. Key Question: What action steps will you take through this CTE POS design and implementation to assist students in improving performance?

   THS will track graduates one year after high school to follow up on their course of study. Students in Auto courses apply a wide variety of academic skills including literacy, mathematics and the sciences. This hands-on application of skills reinforces the learning taking place in the core class offerings. Data regarding student success can be shared with the larger school to aid students in academic and career development.
**Post-Secondary Student Data Analysis—part 1**

An analysis of prior CTE concentrator performance will help identify any performance measures that may need to be addressed to increase concentrator academic and technical skill attainment, as well as the other performance indicators. The analysis of prior CTE concentrator performance data may guide you toward identifying appropriate priority goals and strategies for CTE program improvement.

Prior CTE Concentrator Performance Reports with student performance targets are available at [CTE Student Data Reports](#).

In the fields below, enter the student data you have for prior year student data for up to 3 prior years. Also, enter this year’s Target Performance goals, as well as actual Current Year School Wide Performance Data.

Post-Secondary Student Data Analysis—part 2

Please address the following Guiding Questions for analysis of your CTE performance data listed on the previous page:

1. What, if any, questions does your institution’s performance data raise in regard to your program?

Portland Community College met the targets for five of the seven performance measures. On performance measure 3P1, Student Retention or Transfer, we met the target at the 90% threshold. On one performance measure, 5P2, Nontraditional Completion, we did not meet the target or the 90% threshold; however, because the formula was in the process of being evaluated and would be rewritten so that the details of the definition, and the numerator and denominator better aligned with program efforts, we were told not to be concerned with this performance measure until the update was made.

2. Describe any strategies that your program uses to influence CTE performance data at your institution (e.g. tutoring, professional development for educators, etc.).

Given that it can be difficult to track all of the CTE secondary students to all potential post-secondary sites, PCC measures performance by tracking the estimated percentage of students who meet the entry requirements of the aligned post-secondary program at high school graduation.

Portland Community College does measure on a term by term basis the number of entering students who test into developmental education courses. The college can disaggregate this data in many ways (i.e. age, zip code, high school (if provided)) but we are not yet able to link the data to the specific CTE programs that are POS. We are working on a way to mark these programs in our data system. The plan is for this to take place during the 2010-2011 academic year.

Addressed in answer to question 3.

3. Are there strategies/activities that you would like to incorporate, particularly in performance areas that may be below satisfactory level, in your program?

Every summer PCC’s director of Institutional Effectiveness, two members of the data collection and research staff, and the college’s Perkins Title I coordinator meet to review the Perkins performance measures, targets, and data results. The purpose of this meeting is to make sure that we know where we stand to date in regards to Perkins data collection, reporting and outcomes, and what our plans are for following academic year. Even though the college overall was successful in meeting the targets for the performance measures, we continue to develop strategies to better serve students of any particular category (gender, ethnicity, or special populations) who are not meeting the performance measure targets. This way we can make sure that the CTE Perkins-funded advisors and faculty are aware of the groups of participants and concentrators who are not meeting one or more performance measure(s) and make sure that we are providing them additional time, services and resources to improve our overall data results.

4. What actions will you take in your program to positively influence your institution’s CTE student performance?

During fall 2009 through spring 2010 Portland Community College (PCC) and its Institutional Effectiveness Office (research) began looking at how we might improve our in-house data reports regarding the impact of Perkins funds at the college in Perkins-eligible CTE programs. We chose to expend efforts in this direction so that we could make more informative and strategic decisions regarding our use of the Perkins funds and their alignment with the purpose(s) of the grant. We also rewrote in-house data retrieval programs so that they better align with the Perkins’ definitions for CTE students who are enrolled, served or a concentrator in CTE programs at the college. Most important, we have begun the process with the new in-house data reports to have a clearer idea of who we serve in our CTE programs, who is impacted by the Perkins funds, who should we be serving that we are not, and, finally, what is happening longer term to students who enroll in CTE programs (2008-2010 Perkins Student Longitudinal Progress Report). We were also interested in how long it is taking students at the college to make reasonable progress in our CTE programs. The conversations have only begun but the new in-house data is helping us focus on how we utilize and distribute the Perkins funds, what are the demographics and psychographics of the students we serve, what types of shifts do we need to make in our use of the Perkins funds, and are we using the funds at the college most effectively to assure the long term success of Programs of Study and our work with our regional high schools.
Element 4: Student Support Services

☐ A. Student organizations are an available program component and integrated into CTE programs of study instruction. The student organization structure provides leadership development opportunities that meet the following expectations:
   - Instruction, Career Development and Assessment
   - Community-Based Experiences
   - Organizational Management and Administrative Experiences

☐ B. All CTE students will have informational guidance support and advising to assist them in progressing through a CTE program of study in an efficient and seamless manner (e.g. Pathway Templates, Education Plan and Profile, Career Information System).

☐ C. Programs comply with Title VI - Civil Rights Act of 1964; Title IX – Education Amendments of 1972; Section 504 of the Rehabilitation Act of 1973; Vocational Education Programs Guidelines for Eliminating Discrimination and Denial of Services on the Basis of Race, Color, Sex, Religion, National Origin, Age or Disability; Title II of the Americans with Disabilities Acts of 1990.
   - Appropriate access is provided for all students, including non-traditional and special populations.
   - Program provides a non-biased and non-discriminating learning environment (race, color, national origin, gender and disability status).
   - Program facilities provide physical access and instruction that accommodates students with disabilities including various learning styles (e.g. the use of visual, auditory, tactile, and kinesthetic teaching methods, and other appropriate forms of instruction).
   - Program meets the needs of students for whom English is a second language.

☐ D. Based on the Program Design and instructional plan, each student will be able to:
   - Identify the career path options he/she can follow to a chosen career;
   - Receive consistent and informed messages about career and possible financial options for post-secondary education;
   - Take ownership of their education through maintaining a current education plan and profile and/or portfolio, and
   - Apply skills and traits in a variety of settings including student organizations.

Comments and additional information: Please address the questions for both the Secondary Partner and the Post-Secondary Partner found in the "Areas of Strength" and Priority Concerns" worksheet at the end of this section of the Readiness and Sustainability Tool.

SUCCESSES:
Tigard High Auto assists the school and district’s goal of educating every child. The auto program serves students from all levels and abilities. It serves as a resource for elective credit for students who desire kinesthetic learning opportunities. Auto courses offer an engaging curriculum in a supportive and challenging environment that allows students to apply both intellectual and technical skills.

Students in Basic Auto are introduced to a valuable skill set that is instantly relevant in its ability to open career pathways at the post-secondary level. Students then make the realization that hard work, good problem solving skills and determination can open the door to further technical study and ultimately to certification at PCC and employment. This opportunity gives students a very real sense of motivation to succeed in other areas of the curriculum so that they have not only a reason to come to school, but to graduate and prepare for transitioning into the next levels of education and employment.

CONCERNS:
To improve upon our successes it would be helpful to collaborate with counselors to open Automotive course offerings to more students who receive special education services. Though my classes accommodate a high number of students on IEPs and 504 plans. Some of my best students are regarded as challenged. It is encouraging to see these young people succeed and make plans for PCC after they complete my coursework.
CTE Program Of Study (Perkins Eligible)… 2011 Application (continued)

Student Support Services Post-secondary Partners:
How will you work with recruiting and providing services for non-traditional, displaced homemakers, and other special population students for this specific POS?

As a standard for all CTE Programs, Portland Community College (PCC) is committed to providing equal access to all students through the removal of architectural and attitudinal barriers. All CTE programs at the college comply with a number of state and federal guidelines and Acts that require equal opportunities and access for all students. The Americans with Disabilities Act of 1990 (ADA) and the Amendments Act of 2008 is the primary driver of a lot of the decisions and policies with regard to the Disabilities Services Office.

The College’s Disabilities Services Office ensures that students enrolled in CTE programs are provided specialized assistive technology services to accommodate disabilities in their CTE programs. Disability Access Services (DAS) is the district-wide department that provides the accommodations and services. Examples include adaptive equipment and computer technology, alternate media formatting (audio and electronic texts), in-class aides, media captioning, sign language interpreting and transcribing, and test accommodations.

All Career and Technical Education (CTE) programs at Portland Community College (PCC) recognize that promoting the successful participation and preparation of students in CTE programs that meet the non-traditional (NT) criteria is a priority. At the entry point of all CTE programs, students who fit the NT criteria are identified so that all levels of college resources (Perkins Student Resource Specialists, Tutoring Centers, Multicultural Centers, Women’s Resource Centers, etc.) are aware that these students may need additional support in order to be successful in their chosen CTE program. Some of the students encounter few, if any, issues while others require a great deal of support to work through the academic, technical and social barriers. The greatest resources we have found are to align the students with others (mentors) in both the academic setting and workplace who, at one time, had chosen the same path and are now gainfully employed. These individuals are invaluable resources and offer a tremendous amount of support and encouragement on a personal, academic and technical skill level. PCC still struggles in successfully recruiting students for NT CTE fields. Aside from utilizing a number of the available resources available on a local, state and national level, we will also be doing more targeted recruitment from specific programs college-wide that are providing enhanced opportunities to targeted populations: Sylvania ROOTS Program, CAMP (College Assistance Migrant Program), Workforce Network, Talent Search, Gateway to College, MOTT (Moving On Toward Tomorrow), etc. Perkins funding is utilized to identify students who show interest in NT CTE programs at all levels of academic preparation to make sure they are able to quickly access CTE program personnel and other college resources to guarantee that the connections are made early enough to improve chances of CTE program success.

The Women's Resource Centers at Portland Community College are also an additional avenue for special population students (single parents and displaced homemakers) interested in CTE programs to seek resource information and support both on campus and in the community.

Single parents, displaced homemakers, and women returning to college can take advantage of four programs offered through the college’s Women’s Resource Centers: Project Independence, New Directions, Career Transitions and Life Tracks. The programs are tuition free and provide a variety of skills needed to becoming employed in a family-wage job. The primary goals of the programs are self sufficiency through college preparedness. Students gain access to a variety of educational and training opportunities on the road to becoming economically self sufficient. On-going support is offered after completion of the class. This is the aspect of the program that receives Perkins funding. On-going activities provided might include academic advising, placement assistance, student support services, and community resource referrals. Students are continuously helped with identifying and removing barriers, which impede their success. Classes are offered fall, winter and spring terms.

How will you provide advising and tutoring services to students in this POS?

Portland Community College uses the majority of its Perkins funding on 19 staff who serve as advisors and employment specialists in the college’s CTE programs. Students entering CTE at the college are able to access these highly trained and specialized advisors for all aspects of their advising needs. Aside from general
advancing needs, the staff helps students maneuver the financial aid process, resolve child care and housing issues, seek professional services through college or outside resources for medical and mental health needs, and arrange for group or individual tutoring.

Welding has become a more comfortable area of growth for women through PCC’s welding department’s expansion of individualized course offerings and the sculpture welding course. These courses get women in the door, and once they get in the shop and try welding, they realize that they can do “this welding stuff,” and many of them decide to make it a career and not just an art form or a hobby.

Welding also has a career female welder instructor who has done the job in much more difficult circumstances than in present times, and she serves as a resource and an inspiration to our female students.

There are women in all three AAS degrees of Building Construction Technology. However, the physical nature of the hands-on construction somewhat limits how many women enter that field while many women are more comfortable in the design/build/remodel area. The Construction Management degree is drawing a number of women into a career that tends to be more lucrative and less physically taxing. Students have opportunities through the student organizations they’ve formed to do volunteer team projects out in the community with professionals, providing female students a great opportunity taking a turn at being a project manager at a site. This is also a great way for students to make professional contacts in their field.

**Addendum D: Student Support Services Documentation**

**Directions:** Create an Addendum D folder for properly identified examples of: student support services documentation.

**Required documentation for Element 4: Please provide in Addendum D (see end of Application)**

Give examples (documents, other evidence) of Comprehensive Guidance and Counseling that students will receive. These documents may include:

- Marketing materials for recruitment of non-traditional students to CTE courses
- Tools or skill inventories used to guide course/CTE POS selection
- Secondary partner: Documents illustrating relation to Oregon Diploma requirements:
  1. Academic applications (Extended Application)
  2. Education Plan and Profile
  3. Essential Skills
  4. Counseling and guidance materials
- Post-secondary partner: Documents illustrating:
  1. Recruitment and servicing of non-traditional CTE students, displaced homemakers, and other special population students
  2. Advising and tutoring practices and procedures
Element 5: Professional Development

☐ A. Professional development helps teachers and administrators develop and improve standards-based curriculum and learning experiences that address all aspects of the industry.

☐ B. Research and training is provided to help develop appropriate and useful assessment tools and strategies.

☐ C. Training and guidance is provided to help improve instructional delivery methodology that helps improve student performance and skill acquisition.

☐ D. Secondary teacher licensure is appropriately aligned with the CTE Program of Study and courses in the CTE POS fall within the appropriate NCES codes for that licensure.

Comments and additional information: Please address the questions for both the Secondary Partner and the Post-Secondary Partner found in the "Areas of Strength" and Priority Concerns worksheet at the end of this section of the Readiness and Sustainability Tool.

SUCCESSES:
Tigard-Tualatin School District provides many opportunities for Professional Development during in-service days, continuing education classes, and after school classes. These PD hours help me in the classroom and collecting PDU towards my license. PCC also offers many opportunities for PD on line classes workshops, Tech. days.

CHALLENGES:
Having opportunities offered that address the students of cultural diversity, students receiving special needs and class size.

Since 2009-2010, there has been a continued and increased emphasis on CTE staff and instructors participating in professional development opportunities related to the integration of academics and technical skills into CTE Programs of Study. Appropriate professional development opportunities have been identified and provided to CTE staff and instructors related to their professional development plans and aligned with the professional development needs and opportunities provided by our secondary partners.

PCC supports and promotes its mission, goals and values by continually developing the professional and personal capacity of all members of the community through the efforts of the Office for Staff and Organizational Development. The District Staff Development Office supports PCC's Staff Development Mission by:

- Advocating, promoting, communicating, and coordinating college-wide staff development opportunities
- Funding specific strategic staff development initiatives and programs
- Providing opportunity for professional and career growth to employees
# Certification of Assurance

**Directions**: After filling in all the appropriate fields in this form, print out a copy of this Certification of Assurance page and acquire all the appropriate signatures. All signatures must be on one form, demonstrating the collaboration between all institutions participating in this CTE Program of Study. Mail complete, signed Assurance form to Ilene Spencer at: ODE, 255 Capitol St. NE, Salem, OR 97310

## SECONDARY LOCAL SUPPORT and CERTIFICATE OF ASSURANCE

I have reviewed this program application document for clarity, completeness and adherence to program quality standards, and support its approval. I agree that the CTE program area requirements for secondary CTE programs, including appropriate CTE certification for teachers, the rules and regulations for Public Law 101-392, and the requirements contained in the Oregon State Plan for Career and Technical Education will be complied with in the operation of the CTE programs and services offered by the district or through contract between the district and other agencies, institutions, or individuals. I agree to furnish CTE program data as requested by the Oregon Department of Education.
